

# Digest-EZE®

step 1 for complete digestive health

## Enzyme Action

Cooked and processed foods, alcohol, caffeine, illness, stress and over-exercising are just a few items that deplete our enzyme supply. The enzymes in the new and improved formula in Digest-Eze® help digest proteins, carbohydrates, fat, fiber, dairy products and sucrose (sugar), and help maintain a healthy normal flora in the digestive tract. It prevents the buildup of fat in the liver and arteries, removes hardened phlegm in the intestinal tract and calms a nervous stomach.

A sluggish bowel can retain several pounds of poisonous fecal matter. Many times, the real cause behind sickness and disease is the retention and reabsorption of this toxic waste. The first step in any health program should be stimulating, cleaning and toning the elimination organs. The bowel is the best place to begin; do so with Digest-Eze®.

For best results, use with Co-Clenz™.

## 10 Essential Ingredients

This unique formula contains enzymes that help regulate the digestive system while you sleep.

- **Protease** breaks down long-chain protein peptides to di and tri omega acid peptides.
- **Amylase** breaks down complex carbohydrates into simple sugars.
- **Lipase** converts long-chain fat molecules into fatty acids and glycerols.
- **Cellulase** breaks down cellulose.
- **Lactase** breaks down dairy products.
- **Sucrase** helps break down refined sugar.
- **Maltase** breaks down carbohydrates - particularly maltose.
- **Lactobacillus Bifidus** and **Acidophilus** for added probiotic cultures.
- **Peppermint Leaf** improves digestion and reduces intestinal gas.
- **Bromelain** for its anti-inflammatory properties, and Betaine HCL for its restoration of important gastric acid activity.

## Historical Benefits at a Glance:

- ✓ Increases enzyme supply
- ✓ Prevents build-up of fat
- ✓ Restores gastric acid activity
- ✓ Reduces intestinal gas
- ✓ Calms a nervous stomach
